Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent number 6,654,478 (Tsuchikiri et al) in view of U.S. 2002/0197512 A1 (Aizawa et al).

Regarding claim 1, Tsuchikiri et al discloses an electromagnetic sound producing device (figure 3) comprising: a case (1) comprising an upper case (11) and a lower a case (21); a circular recess formed in an upper surface of the lower case (21); terminals embedded in the lower case and a yoke (31), a coil (41), a permanent magnet (51), and a diaphragm (61) provided in the case, the yoke having a circular shape and being mounted on a bottom of the circular recess of the lower case; and the coil and the permanent magnet being mounted on the yoke and the diaphragm being stacked on the permanent magnet..

Tsuchikiri et al does not specifically disclose the permanent magnet being made of SmFeN-base isotropy plastic magnetic material.

However, SmFeN magnets are being employed as a magnet is well-known in the art. Aizawa et al teaches that the magnets are made of SmFeN (# 4).

Therefore, it would have been obvious to one ordinary skill in the art to use any material for the permanent magnets (51) of Tsuchikiri et al such as SmFeN-base isotropy plastic magnetic material for providing a high maximum energy product (# 4 of Aizawa et al).

Regarding claim 2, Tsuchikiri et al also discloses wherein the permanent magnet has a cylindrical shape (see figure 3).

Regarding claim 3, Tsuchikiri et al further shows the yoke has a center pole and the coil has a cylindrical shape and is mounted on the yoke, surrounding the center pole (see figure 3).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
